Basic education has to spread to even the lowest rungs of society, and this alone can instill a sense of humility in people. With this as the foundation, Lok Bharati imparts practical knowledge to its students which is suitable to the Indian psyche and culture, as well as useful to society at large. Not only is this basic education given free without any fee, the needy students are also given scholarships.

## Our Vision

विद्यां च अविद्यां च यस्तद् वेदोभयं सह ।  
अविद्यया मृत्युं तीर्त्वा विद्ययाऽमृतमश्नुते ।

As stated in the shloka from *Ishopnishada*, “Avidya” helps man to acquire knowledge of physical sciences and skills which enables him to carry out all the responsibilities of life, social customs, and duties and have worldly comforts through earning one’s bread. In other words, “Avidya” provides enough strength to cross-over the ocean of life from birth to death. After the successful journey of life, man receives the ultimate spiritual knowledge and satisfaction as equal to immortality through “Vidya”.

Hence the visionary dream of *Lokbharti* is to worship the study of both *Avidya* and *Vidya* parallel which enables man to live in the cosmic world as well as to have perpetual inner development through humanities.

## Our Mission

The mission of *Lokbharti* is to spread the un flickering flame of people-oriented education to the poorest man of village ushering sustainable development in accordance with the Nature and Culture of our country.

### [1] Profile of the Institute:

At the age of 71, with a strength of willpower befitting a young man, he started *Lokbharti* at Sanosara.

Inaugurated on 28<sup>th</sup> May, 1953 by Shri Kaka Saheb Kalelkar, the great Gandhian, and based on the Sarvodaya principal of truth and non-violence, the *Lokbharti* Gramvidyapith is an ideal example that shows basic and higher education can contribute towards solving rural problems practically.

Basic education has to spread to even the lowest rungs of society, and this alone can instill a sense of humility in people. With this as the foundation, *Lok Bharati* imparts practical knowledge to its students which is suitable to the Indian psyche and culture, as well as useful to society at large. Not only is this basic education given free without any fee, the needy students are also given scholarships.

Shri Nanabhai said that *Vidya* which is biased, is burdensome, and that *Vidya* without character is like knowledge of Brahma Rakshas. Therefore, he felt that it was important for students to stay in the campus hostel of *Lok Bharati* to acquire *Vidya* with character and fellow feelings.

Founder Shri Nanabhai Bhatt

The aims and object of Lok Bharati are represented by its motto. Vidya or introspective knowledge of the self, and Avidya or knowledge and skills that one learns in life, must be taught together in a correlated based on practical, productive labour and social living together.

The absence of this kind of correlated education, has led to an almost dichotomous partition between the 'classes' and the 'masses' thereby weakening society. Unless correlated education is given to the vast majority of rural Indians, real democracy cannot exist. The current system of education, a British legacy, makes the education individualistic rather than social. Thus the educated individual is alienated even as lives among the uneducated masses.

The remedy for this social evil is to make hostel life the center of our educational plans. In a hostel, students learn to live and work together in harmony, doing useful, productive work on campus. Thus whatever knowledge and skills the students acquires is in the context of a close contact with society and its healthy development.

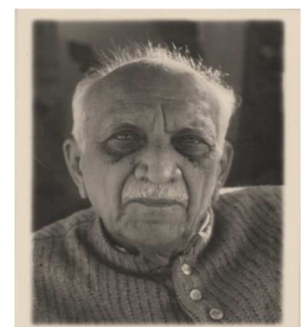

This is exactly the kind of correlated education that Lok Bharati strives to impart to its students, thus qualifying them for the practical experiences of life and society. An example of this is the study of the problem of water shortage, and the subsequent solution through conservation and economical use

Education is a continuous process. To maintain this continuity and foster a sense of national pride, the concept of community life lays emphasis on co-education, physical labour, education by mother-tongue, wearing of khadi, agriculture, gopalan, co-operation, and further given importance to subject like economics, science, philosophy and political for practical living.

Lectures are given by visiting expert and professors on a variety of subject. To import practical experience to students, relief work is done by students and staff alike during famines, floods, earth quakes and communal riots in distant parts of India such as Assam and Bihar. Culture festival are celebrating with an emphasis on social awareness.

The family-like atmosphere of the institution has entire educational process free and fearless.

The uniqueness of Lokbharti lies in its educational system. In India, only technological education seems to have born some fruit. There are three major drawbacks of the traditional educational system. First, it is not practical as it is only service-oriented. This has given rise to the phenomenon of the educated unemployed, which is a contradiction in itself. Second, the traditional educational system tends to alienate the individual from society, with the result that bureaucracy becomes exploitative. Third 72 per cent of India's population lives in the villages. production of primary and essential wealth takes place in the rural areas. Despite this, the educated are centered in urban India and they look down upon the rural poor. The country is thus sharply divided into two unconnected parts-the majority which is in the villages producing wealth, but without scientific knowledge of agriculture or dairy development, and the minority which is the educated traditionalist, who have no dialogue with or understanding of the other half.

Shri Manubhai Pancholi

Lok Bharati's dream is to find a solution to this problem. Today's education should be rural-oriented. It should be practical, socially relevant and less verbal and figurative. This would not be industrial education but practical education with reference to society. It should have compulsory residence with community life so that a sense of responsibility towards to society becomes natural. Social problems which exist today should be correlated to this education. And contact with economics, science, politics and philosophy should be emphasized.

Man is essentially a two faceted being: one is a wealth producing being, and the other is a socially conscious and aware being. To make every man and woman an embodiment of this dual entity is the goal at Lok Bharati.

**LokBharati Lokseva Mahavidyalaya**

Lok Bharati Gram Vidyapith’s main education section, Lokseva Mahavidyalaya gives a graduation after completion of a three –year course.

Lok Bharati’s graduates have been prepared on the basis of the thinking of shri Manubhai Pancholi, that a graduate of Lok Bharati should be able to have detailed discussions on Vedant and quote Sanskrit shlokas, while farming in the fields. He should also be able to go to the market with a basket on his head and be able to sell vegetables without being cheated.

**Some salient features of Lokseva Mahavidyalaya**

1. In Gujarat, Lokseva Mahavidyalaya was the first institution to be granted autonomy by UGC.
2. Balanced, practical and real life-oriented education is imparted through the mother tongue. English is taught to students as a voluntary subject.
3. Everybody is taught to take pride in physical labour by doing hands-on work for 250 hours per year.
4. The emphasis is on rural-oriented education backed by research.
5. Apart from 50 per cent marks for annual examination, the remaining 50 per cent is through internal evaluation.
6. Freedom is given to the teachers to try various educational methods, and examination and evaluation systems.
7. Instead of connecting post to salary of the staff, capability is taken as the criteria for salary payments.
8. Three months placement internship programme during the third year of the educational course for students.
9. Thurs, camps, lectures, cultural programme, group discussions, demonstrations, film shows, interviews, etc. are organized regularly to help students develop an emotional bond with the society they live in.
10. Admission is on the basis of oral and written entrance tests.
11. Lokbharti graduates are welcomed by universities for further higher education.

**Faculty of Rural Studies (B.R.S.)**

## [15] Research work:

### 1. Wheat Research work

The Basic aim of the wheat research is to create an opportunity for the students to involve research work and ultimately helping to farmers by developing suitable wheat variety of wheat. Students learn various skills and sense of responsibility by handling the various operation of wheat research.

During this year farmers saw demonstration of scientific farming method of sweet corn maize, sesame, cotton, millet and wheat. The agronomy students got various crop experiments by perceptible education. This department making one laboratory for the students of Lokseva Mahavidhyalaya. They got platform for various crop production and student satisfied with perceptible works.

Nearest farmers and Gujarat, Madhya Pradesh and in Maharashtra Lok-1 foundation and certified seed 56 tones available for various farmers. Research station take on farmers 5to6 new trial seeds. They showed some goods results.

-Productive manual labour( Special Wheat *Shram*) for the students of F.Y.BRS was arranged during 2<sup>nd</sup> May to 4<sup>th</sup> May, 2018.

-70 to 80 % work of the research work has been carried out by the students of Lokseva Mahavidyalaya. Because of this, there develops skills, knowledge and sense of responsibility among the students.

we have more than 2000 of wheat variety from their 700 to 800 varieties sown from Karnal, vijapur, maxicos wheat research center and national center testing those varieties.

#### wheat nursery :

1. EIGN -88. variety -4 check
2. 82. variety
3. 91. variety -4 check
4. 64. variety -4 check

#### Trial-1 :

- 1.-7 varieties from karnaal
- 2.varieties from vijapur
- 3-23 varieties

#### Trial-2:

- 1-16 varieties -lokbharti
- 2-17 varieties -lokbharti
- 35- varieties minimum water use

#### Germaplasm :-

- F-1-36 variety
- F-2-17 variety
- A-5-81 variety

Crossing programme – in this 98 new cross

- Trial 5 varieties given for testing to indore and nagpur.
- Lok-1 Nucleolus seed production in 7 acre ( Production 3720 kg )
- Institution has prepared lok-1 breeder seed in 80 acres. (1,21,000kg produced)

SOYABEAN crop Research work :-

- Breeder Seed of Soybean variety JS- 20 has been produced in 6 hector land. (2540 kg production)
- Soybean demo-6 varieties – 1.-37, 2.-86, 3.-335, 4.-93-05, 5.-95-52, 6.-20-29. following those 1.-37, 2.-86 production good.
- Soyabin trial -2:-
- -42 entries 3 replications
- -275 entries of Germplasm
  
- Testing of Groundnut G-20 certified seed .
- Tha students of TYBRS have conducted experiment of Preparing pot from dung under the guidance Dr shridharbhai.
